MEMORANDUM

SUBJECT: Review of the Quality Assurance Project Plan for the Seldovia Village Tribe's Revised Fish Contaminant Study

FROM: Ginna Grepo-Grove, USEPA
R10 Quality Assurance Manager

TO: Katherine Brown, Tribal Coordinator
ETPA, Region 10

The review of the above listed QAPP has been completed. The QAPP was prepared by the Seldovia Village Tribe (SVT) for the USEPA's Indian Environmental General Assistance Program (IGAP). The QAPP and supporting documents submitted by SVT are sufficient to meet the goals of the project. The QAPP covered all the general QA elements required by USEPA for a QA Project Plan and is hereby approved. Environmental data collection, generation and/or use can commence as scheduled. It has to be noted, however, that due to resource limitations the sampling design, number and types of fish samples that will be collected for this project may not be sufficient to support a fully robust fish consumption and contamination study.

Please send me the final signed Signature and Approval pages of the document. Contact me at grepo-grove.gina@epa.gov or 206-553-1632 if you have questions.
